

PROFILE

Who We Are

Based in Riyadh, NEXRA Services delivers specialized technical solutions to dental clinics, healthcare centers, hospitals, and healthcare organizations across Saudi Arabia. Our approach combines hands-on technical expertise with structured service processes to help customers minimize downtime, maintain equipment reliability, and achieve greater operational continuity.

Our Purpose

To keep the equipment healthcare providers depend on — running, compliant, and ready — through disciplined technical service, transparent communication, and engineering-grade precision.

What Sets Us Apart

Engineering Rigor

Technical decisions grounded in documentation, not guesswork.

Responsiveness

Field support structured around facility uptime, not office hours.

Transparency

Clear scopes, clear reporting, no surprises mid-project.

What We Do

NEXRA Services supports healthcare and dental facilities across the equipment lifecycle — from planning and installation through maintenance and long-term technical support.

01

Installation & Commissioning

Site preparation review, equipment installation, and commissioning support for dental and biomedical systems.

02

Preventive Maintenance

Scheduled maintenance programs designed to reduce downtime and extend equipment service life.

03

Technical Support & Repair

Responsive diagnostics and repair support delivered by trained field technicians.

04

Spare Parts & Logistics

Organized inventory and delivery tracking

05

Procurement Advisory

Technical guidance during equipment selection and tender preparation for healthcare facilities.

06

Facility Planning Support

Utility and layout coordination for clinics and treatment rooms prior to equipment install.

How We Work

01

Assess

We review the facility's equipment, utilities, and technical requirements before any work begins.

02

Plan

A scope of work is defined together with the facility — timelines, resources, and responsibilities are agreed in advance.

03

Execute

Qualified technicians carry out installation, maintenance, or repair work to documented technical standards.

04

Support

Ongoing monitoring and responsive support keep equipment performing after the initial engagement ends.

Every engagement is documented from first assessment to final handover — so facility teams always know the current status of their equipment.

Who We Serve

We work alongside the organizations responsible for keeping healthcare facilities equipped, compliant, and running.

- Hospitals & Hospital Procurement Departments
- Dental Centers & Dental Clinic Groups
- Biomedical Engineering Departments
- Government Healthcare Organizations
- University Hospitals & Medical Cities
- Private Healthcare Groups & Facility Managers

Regardless of facility type, the goal is the same — equipment that performs when it is needed most.
